

Monday 8th December 2025

Dear Parents and Carers,

I am thrilled to inform you about an exciting opportunity for our Key Stage 2 pupils to participate in our reboot of the First LEGO League Challenge.

This year, our LEGO coding program will focus on reusing the LEGO sets and robots from last year. Children will build on their existing knowledge by learning how to design and construct robot attachments that can complete elements of the challenge we were unable to master previously. The emphasis will be on creativity, problem-solving, and teamwork as we explore new strategies and improve our skills.

Please note that there will be no competition this year; our goal is to strengthen understanding and confidence in robotics and coding through hands on learning and collaborative projects.

By taking part, pupils will have the chance to explore innovative ideas, learn about the latest in technology, and foster a love for creativity and design. These experiences align with key curriculum areas and develop essential life skills that will benefit them both in and outside of school.

I will be running a series of preparation sessions after school on a Monday throughout the spring term. It's important to note that places for this club are limited. If your child is interested in joining us, please take a moment to register your interest by sending an email to enquiries@grimoldbyprimaryschool.co.uk addressed to Mrs Smith, mentioning "LEGO Challenge" in the subject line.

I am so excited to begin this project and can't wait for us to start. Thank you for your continued support. We look forward to inspiring the next generation of innovators together!

Kind regards,

Mrs Amanda Smith
