Louth Lions Vision Camera- Thursday 19th June

Dear Parents and Carers,

We would like to inform you that on Thursday 19th June at 11:00am, children in Year 1 will be having their **vision tested** by vision cameras in school. This will be carried out by Louth Lions, free of charge. The test consists of an instant screening of your child's eyes to determine the presence of eye disorders. No physical contact is made and there are no eye drops involved. Please note that if your child wears prescription glasses already, they will screen your child without their glasses.

If your child requires a referral following the check, you will receive a letter providing further details. Please note that it is your responsibility to follow this up with an optician, should you wish to take the referral further.

If you have any questions or would like to opt out, please feel free to contact the school office.

Thank you for your continued support.

Kind regards,

Jen Smith and Laura Field

Year 1 Teachers
