

Thursday 29th February

Dear Parents,

I am excited to share that the week commencing the 11th of March is British Science Week, where children will be participating in lots of science themed activities within their classroom. Each year, British Science Week has a theme and the theme this year is 'Time' so all of the activities will be centred around this. Make sure to look on X and ask your child what they have been up to when the time comes.

To launch British Science Week, we will be having an assembly all about different careers in science, technology, engineering and maths, which children could aspire to become in the future. In order to inspire our children as much as possible, we would love for some of our amazing parents to come in and speak briefly about any career that they have in STEM. The assembly itself will begin at 9am and will be no more than half an hour, but if you are unavailable to come in at this time, videos are equally appreciated. If you have a career which is related in any way to STEM and would like to be involved, please contact me via enquiries@grimoldbyprimaryschool.co.uk for more information.

Yours faithfully,

Miss Milson

(Science subject leader)
